

LARRY 2

Course Designer: Larry Del Pizzo

24 Rounds

START POSITION: Standing in the box with your trigger finger on your nose.

From the box, double-tap the first 2 targets; then move to the first wall: From behind the wall (either or both sides) double-tap the shoot targets; then move to the room: The room will have 1 or more targets which may be all shoot, all no-shoot, or a combination of the two. Using cover, double-tap the appropriate targets in the room; then move to the second wall: From the left-side of the wall, double-tap the two targets on the left using your left hand only; then from the right-side of the wall, double tap the remaining two targets using your right-hand only.

Notes: Each hit on a no-shoot target will result in a 10 second penalty. Failure to shoot from concealment will result in a 10-second penalty for each shot fired in the open. The painted portion of cardboard targets are behind hard-cover so no hits in this area count for score. When there are more than 2 hits on a target, the best 2 count for score.
